SUMMARY

Software Engineer with around 2 years of experience in developing scalable solutions. Skilled in **React, Redux**, and **Node.js**, specialize in building high-performance web applications that are both responsive and user-centric, with a strong focus on writing clean, optimized code that ensures scalability and maintainability.

SKILLS

Programming Languages

JavaScript,
TypeScript,
HTML, CSS, Java,
Liquid

Frameworks, SDKs, Libraries

ReactJS, React
Native, Redux,
Context API,
NodeJS, ExpressJS,
Bootstrap, Material-
UI, Jest, React
Testing Library

Tools & Services

Git, Github, Jira,
Figma, Postman

Database

MongoDB,
PostgreSQL

EDUCATION

B.Tech in Electronics and Communication Engineering

Cooch Behar
Government
Engineering College
08/2019 – 08/2023

- **Grade:** 9.2

PROFESSIONAL EXPERIENCE

Frontend Developer

Ecom Experts ✉

08/2025 – Present | Montreal, Quebec, Canada (Remote)

- Developed features like **custom product filters**, **dynamic cart updates**, and **personalized upsell section** and implemented a pixel-perfect redesign using **React.js**, **HTML**, **CSS**, **JavaScript**, and **Liquid**, following industry-standard practices.
- Implemented a backorder functionality for international B2B customers, ensuring domestic customers remain ineligible based on business rules and regional logic.
- **Developed checkout extension** to display **product recommendations** on the checkout page, improving user engagement and achieving around **18% increase in upsell click-through rate** using **React.js**, **Typescript** and **GraphQL**.
- Implemented **GTM** and Google Analytics, and developed custom tracking pixels to monitor and analyze customer interactions and event data, improving data accuracy and marketing attribution by **40%**.

Associate Software Engineer

Tech Mahindra ✉

03/2024 – 07/2025 | Kolkata, India

- Designed and rebranded storefronts based on client requirements by developing **reusable, modular React components** with **TypeScript** and maintaining a consistent, scalable UI architecture. Reduced the number of unnecessary external scripts, used lazy loading and optimized performance, optimizing state management with **Redux Toolkit**, **improving load time by 15%**.
- Built **real-time features using Socket.IO** enabling live user activity, inventory synchronization, and instant notifications. Additionally, performed data migration and developed extensions using **Node.js** and **React.js**.
- Identified and resolved complex technical issues to enhance platform stability and performance, contributing to a **35% increase in customer retention**.
- Maintained code quality, adhered to coding standards, and performed code refactoring across all development phases.
- Collaborated within **Agile** teams, working in **sprints**, and effectively used **Jira** for planning, tracking, and managing development tasks.

Full Stack Developer Intern

iNeuron.ai ✉

07/2023 – 09/2023 | Remote

- Developed a user-friendly UI using **React.js** with **Node.js**, **Redux**, user authentication, **CDN** image uploads, and improved page performance by **20%**.
- Handled data processing through **RESTful APIs**, implemented payment method.

PROJECTS

MyBilzee ✉

React, Typescript, React-Redux, Tailwind CSS, NodeJS, ExpressJS, PostgreSQL

- Developed a comprehensive business and inventory management application to efficiently handle billing, stock, and reporting. The system features **GST-compliant** invoicing, **real-time stock tracking** etc.
- Implemented **authentication and access control**, enabling secure user permissions, along with **party (customer/vendor) management**, **item creation and updates**, and **item serialization** to ensure accurate inventory tracking and controlled system access.
- Built **multi-branch store management** with branch-wise creation and administration, along with **branch-specific purchase and sales reports**, including **visual dashboards and graphs** for clear business insights.

DevBook ✉

ReactJS, React-Redux, NodeJS, ExpressJS, MongoDB

- **DevBook** fosters collaboration and knowledge-sharing within the developer community.
- **Markdown** support for **code language** tagging in posts.
- Managed the state with **Redux** and secured with **jwt authentication**.
